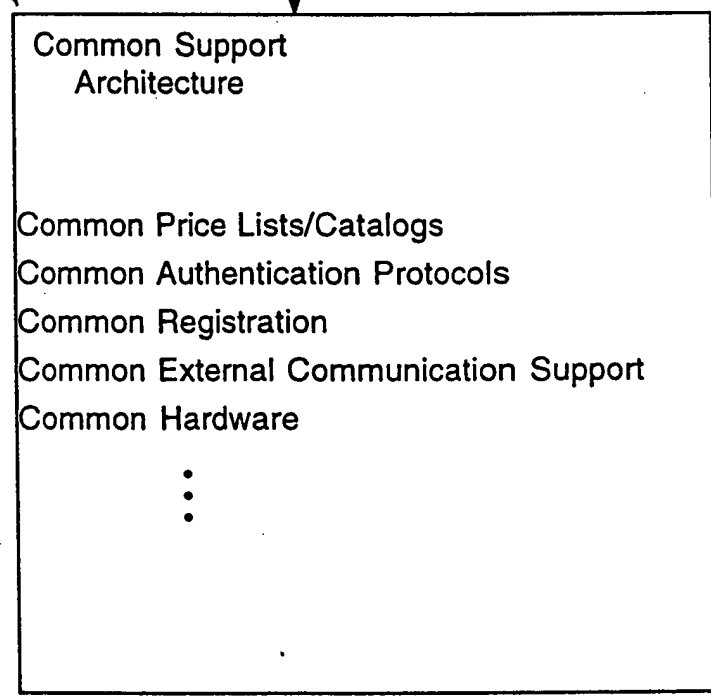

FIG. 3

400

Define a common instance using  
a common schema

401

Implement a common support  
architecture having common  
components for the multiple  
exchanges

402

Slice the common instance into  
multiple exchanges for respective  
exchange operators/owners

403

Implement efficient  
communication between the  
multiple exchanges within the  
common instance

404

Implement external  
communication with external  
processes outside the common  
instance

405

Present a custom view of the  
respective exchanges to their  
respective owners/operators

406
